Cyber Security Consulting

## vSEC Services and Pricing

vSEC projects focus on meeting the business and security needs of each client. The price range reflects the time, expertise and scope usually needed to provide these services.

### **Monthly Virtual CISO Services**

\$6,000 to \$15,000 / month

This ongoing work covers an average of 1 day to 2 ½ days a week of leadership and support by a 10 to 20+ year security professional to develop a firmwide cyber security program. From assessment to strategy and roadmap, and implementation to monitoring and reviewing effectiveness.

### **Cyber Risk Assessment**

\$6,000 to \$11,000

Perform a general cyber risk or controls assessment, often using the CSF or CIS-20 frameworks. Other frameworks available.

### **Vendor (Third Party) Risk Review**

\$3,000 to \$8,000

Annual project to review appropriateness of security certifications or controls of a client's own vendors. Initial focus is on vendors providing critical services and access to critical systems or confidential data.

### **Incident Response Plan, Table Top Exercise**

\$15,000 to \$30,000

As a project, review or draft an Incident Response Plan, or perform a 'Table Top Exercise' to test the plan and the Incident Response Team in an event scenario.

### **NFA 9070 Annual Review**

\$3,000 to \$6,000

For NFA regulated firms, perform a review and statement of the appropriateness of the firm's Information Systems Security Program (ISSP). [Click here for a 9070 self-assessment.](#)

### **Quick Requests**

\$350-\$400 / hour

For quick requests for assistance not covered within a project or support agreement, vSEC often can provide support on an hourly basis. Requests might include a review of the cyber security clauses in a contract, assistance responding to a client security survey, or advice before purchasing a security tool or service.
